

Text Introducing Judy Abdrabo's work

Photos for me represent words, emotions, states of minds; by only looking at them, for that photography is one of my favorite hobbies.

I started photographing professionally from last year, I work with a Canon EOS 1300D and it's also called Canon Rebel T6. And I also use a 18-55 Lens.

Shooting portraits is one of my favorite type of photography for that most of my shoots are portraits but I'm willing to wide up my skills and start with landscapes and products shooting.
