

## THE RING ROAD IS...

The Ring road is city, the Ring road is metropolitan, the Ring roads is connection and the Ring road is border. The Ring road represents a former model of the city and a model of the future in transformation.

The Ring road is a space wich is lived-in, open, and wich creates relationships and connections, but also separates and suffocates. The Ring road is diverse and builds multiple stories and narratives according to the experiences of each citizen. The Ring road is..., also, the sum of these Renderings

I delve into a kaleidoscopic narration of the metroplolitan city made upof pieces of different lives and specific circumstances, The images putt he focus on the characters of people and the relationship they have with the área, and they illustrate the narratives of everyday stories that bring life to the áreas the infrastructure penetrates.

The Rinf road is and area and an infrastucture that is thought about and used at 80km/h, and where it is often difficult to slow down in order to include the points of view of those who live alongside and suffer with it.

Rosa and Francesc, William, Enric, Xavi, Ana, Sumpta, Jordi, Ricard, Xavier, Carmen and Pilar: Thank you for allowing us to create purposeful portraits of your lives.
