

Hope of Life- submitted by Ryda Simon.

The magic of hope in life is love, first need to love our self and spread it around. Life is so precious, sometimes we may stumble or fall but crucial matters in rise from it peacefully and happily. Every day we wake up with new challenges, but we get to decide how we confront them. Set goals to our life, achieve and smash the hell out of it. The only one who is hindering our goals is from within us only, and our competitions are within ourselves, be our best versions not to prove others and be grateful to the Lord always.

Live every moment without regret, laugh a little more, and be ourselves then our smile be longer than yesterday's sorrows. Compassion at all corners and walks of life is God given, people are either born with it or not. Let raise our voice for the voiceless and in any injustice happenings around us, let no one dictate their norms and fancies to us and disrupt our peace, may Lord guide us and make our path easy.

As 2020 is ahead, let us see ourselves in a different light, one that empowers and not that disheartens the MIGHTY you!

Goodluck everyone and happy new year.
