

Project(Unspoken Life):

Ballet dance was the topic of my thesis and also was the first clue to attain to another aspects of dancer's life, especially Pole dancers. May be it seems modern dance is a very simple and duplicate topic for photography, but actually if you are follow them in some Middle East countries is not. There are many limitation and restriction for Dancers that don't allow them to have practice and performance in public.

Pole, Aerial silk and Ballet dance are very big taboo in Iran and unfortunately dancers have to hide the big part of their life to survive in the society. The part that is their soul and everything. They have to practice in secret place or their home with minimum facilities. But with all of these stressful situation they are strong and fighter to achieving their dreams. The dreams that is wasn't that much difficult if they didn't born in Iran.

I influence by their effort and personality and I really admire them in this complicated and difficult way. It was the reason that I decide to show my vision of their life.
