My name is Ekaterina.I was born and raised in Tyumen, Siberia.My acquaintance with photography began with a love for old photos of our family archive. One of my favourite pastimes was to get hold of old photo albums and curiously examine black-and-white analog images. I started taking my first pictures with a simple consumer digital camera when I was in school. I took photos of everything I saw around. Like landscapes, architecture, objects, people.

Two years later, I got my first professional camera, after which I started doing commercial photography.

It`s been more than 15 years since I became a photographer. Now I live and work in St. Petersburg. For me photography is the way of self-expression and showing the world around us with the help of its artistic techniques.
