

## **Asmat Gogatishvili**

### **Bio**

I am Asmat Gogatishvili a philologist from Georgia. I was born in the oldest city Kutaisi, now I live in Georgia's capital city Tbilisi with my family (husband and three sons).

Three years ago I chose photography as my main profession and it became an inseparable part of my life. I do my favorite work with great love and enthusiasm, which gives me the greatest pleasure, and I think that I am engaged in the most creative field. I cannot imagine my daily life and development without this field.

I love interacting with people and nature, and I try to use photography as a communication language.

I am a participant and winner of several local and international photo contests and festivals, including of the international women's organization "Sorooptimist-International" the photo contest "We Stand Up for Woman" (3rd place) and others, as well as the social cognitive photo project "Alphabet with Fingers" author dedicated to persons with complete and partial hearing impairments.
